Prior art such as US 5566760 and US 5855878 are distinguished in teaching away from using a cross-linking agent in the compositions and method. The prior art in general while teaching compositions containing hydrophobically modified gelling agent polymers in combination with surfactants and cross-linking agents, fails to teach the combination of the specified level of nonionic surfactant and combination of hydrophilic groups having the specified molecular substitution, such as in claim 33.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
